THE CHARLEROI MAIL

VOL XIX. NO 142. CHARLEROI, WASHINGTON CO., TUESDAY, NOVEMBER 19, 1918 TWO CENTS

SPANISH INFLUENZA, ITS CAUSES AND HOW IT SHOULD BE TREATED

How to Take Care of The Body to Prevent This Disease

CLEANLINESS MOST IMPORTANT

The heavy increase in the new cases of the so-called Spanish influenza in Charleroi naturally calls renewed attention to this malady, which appears to be getting a greater hold on the community than ever before. Health Officer Darby furnishes the Mail with the following extracts from a treatise written by Dr. A. P. Davis of Cincinnati, and which appears in the Christian Herald of that city:

"The disease called influenza is caused by the atmospheric changes and the peculiar temperature existing and the enervation of the victims on account of the arrest of the circulation of the blood and other fluids of the body, a closure of the pores of the skin and an increased accumulation of blood into some or all, of the internal viscera, especially the kidneys and the glandular system, causing toxemia. For want of arrest of the congestion the poison increases until it finally overcomes the vital forces, and pneumonia ensues.

The disease is said to be caused by a bacillus and is characterized by chilliness, sneezing, nasal discharge, intense pains in the head, chest and back, cold perspiration, cough, expectoration, prostration, sometimes nervous manifestations and gastro-intestinal disturbances, elevation of temperature and increase of pulse and respiratory rate.

The malady needs more attention than the old-time grippe. The patient should be kept quiet, in bed, and restricted in diet, and use such means as will remove the toxemia from the body.

A good Epsom salts bath—two or three pounds to ten gallons of hot water—as warm as the patient can bear; bathe therein for 10 or 15 minutes, being rubbed while in the water with a bath towel, then with a towel wet in clear cold water—rapidly going over the body—and then thoroughly rubbed with a dry, coarse towel until the skin is a glow of redness. then be placed in bed for a few hours, and then take a colonic irrigation with water a gallon, Epsom salts two tablespoonfuls and one ounce of glycerine carried up into the colon through a colon tube well oiled.

If there are pains in the abdomen or lungs use cloths wrung out of hot water—two tablespoonfuls Epsom salts added to a gallon of water. Apply three or four thicknesses of a bath towel, repeating the application every few moments until relieved of pain.

The cause of influenza or lagrippe and all other diseases is a lack of some constituent of the blood. The twelve organic salts of human blood, properly applied, cures all curable diseases.

Keep the skin free-cleansed with water and friction. Live on plain, simple diet, sleep in well ventilated rooms, take proper exercise and cast off fear and you will not take influenza—nor even smallpox,nor any other diseases.

BIG MAJORITY FOR BOND AMENDMENT

While returns from a dozen counties are still missing unofficial figures for the balance of the state on the fifty million dollar bond issue voted for in the recent election, show that the amendment has a majority of at least 225,000 votes.

ADDITIONAL HELP AT THE EMERGENCY

Thirty new cases of influenza were reported to Health Officer Darby this morning, with two physicians to hear from, which probably means that about 40 new cases developed in the community on Monday. The exact number for Saturday and Sunday was 97, the belated reports from physicians turning in 22 more to the health officer. As on previous days, some distressing situations have been found by the health officer, who is doing everything in his power to relieve many distressed families.

At the emergency hospital no new cases were admitted on Monday but some few were discharged. Additional help has been secured, both registered nurses and volunteer aid. Two registered nurses, Mrs. Cook from Belle Vernon and Miss Bach from Cumberland, have been engaged one being on day turn and the other at night. The addition of volunteer aid has also assisted in relieving the situation and conditions have been materially improved at the emergency so far as help is concerned.

COMPLETE REPAIRS AT LOCK NO. THREE

United States Engineer W. D. Fairchild, in charge of locks and dams on the Monongahela river, intends to make the repairs which are now under way at Lock No. 3, near Elizabeth, complete, and to prepare for a record breaking tonnage during the year. It is contemplated to bulkhead the entire inner chamber and at once complete the repairs, which are necessary for the operation of that lock. When repairs are finished similar work will be done to the outer chamber. Lock 3 has been giving government officials as well as steamboatmen a great deal of trouble the past month, and has seriously interfered with the coal trade of the upper valley.

Changes Planned For Bentleyville Camp Ground

The Bentleyville Union Holiness Association, which controls the historic old camp ground at Bentleyville, on Friday last disposed of 10 acres of the property of the association adjoining the camp grounds proper on the east. The sale in no wise affects the old camp ground. The sale included the land and the timber thereon, but reserved the coal. At the same time the association disposed of 212 oak trees on the camp ground, trees that were on the decline. Their removal will not effect materially the grove of the camp ground. Every tree that will be taken will be replaced with a maple. The purchaser of the land and the trees was Charles E. Myers of Bentleyville and the consideration was close to $7,000.

The association still holds 20 acres of land, which includes the old camp ground. The company also reserves the coal under the entire tract, about 30 acres. For this coal $500 an acre has been refused.

The association now has in view the improvement of the grounds with the idea of a summer resort, as well as to continue each summer the camp meetings. The company has a splendid location for an artificial lake, and it is the idea to construct such a lake as will cover about an acre and three-quarters. The grounds will be made a resort for a quiet vacation with no amusements of any kind, other than life in the open, boating and bathing. The grounds and buildings thereon will also be improved.

PASSENGER FARES MAY BE REDUCED

A general reduction of the present passenger fares on the railroads is under consideration by the railroad administration. Passenger fares which were increased last June in some instances as much as 50 per cent were frankly aimed at reducing railroad passenger travel. When the military demands for passenger equipment begin to decline it is probable that tourist and other travel will be encouraged again to take up the slack.

Troop demands on the railroad are expected to continue for some time. When this is over thousands of cars will be set free for ordinary passenger travel. Halting of war industry will likewise have an effect and it is believed that the general effect of a reduction on the railroad revenues will not be serious.

CHIROPODY PARLOR IN SHOE STORE

On page 3 of this issue of the Mail, Claybaugh and Milliken, shoe merchants of this city announce the opening of their new Chiropody Parlor.

This is an added feature to their already, almost unequaled service and their aim in this department is to relieve the foot suffering of all those in this section of Pennsylvania.

The chiropody parlor which is in the rear of their store will always be kept in the most sanitary condition and is equipped with the most modern appliances known to scientific chiropody.

Dr. M. C. Alenburg, chiropodist, in charge of this new department is a graduate of the National School of Orthopraxy of St. Louis, Mo., and with several years of practice in Cincinnati, O., and Uniontown, is fully qualified to handle this work.

FUNERAL SERVICES FOR MRS. JEFFRIES

Mrs. Dolly Jeffries, a former member of the Charleroi public school faculty, who died in the Passavant hospital, Pittsburg on Saturday, was a victim of pneumonia, having been ill but three days from the malady. She was aged 46 years. She was the daughter of former Sheriff and Mrs. John T. Goodwin of Waynesburg and the widow of Thomas A. Jeffries, whose death occurred 12 years ago.

Besides her four children, there survive her parents, two brothers, Randolph Goodwin of Wilkinsburg, Edward Goodwin, West Finley and one sister, Miss Flossie Goodwin of Waynesburg. She was a member of the Presbyterian church.

Private funeral services were held this afternoon at 3 o'clock at the home of her parents in Waynesburg, which were in charge of Rev. Charles Harmon of Brownsville for many years her pastor. He was assisted by Rev. A. J. Morris, D. D., pastor of the First Baptist church of Waynesburg. Interment took place in Oakmont cemetery.

HAROLD WICKERHAM COMMISSIONED LIEUTENANT

Sheriff Frank B. Wickerham has received official notification from the war department that his son, Harold Wickerham, who is with Company A, 110th U. S. Infantry now in service overseas, has been commissioned a second lieutenant with rank since October 7th.

SAND AND GRAVEL PRODUCTION IS AN IMPORTANT INDUSTRY

Ranks Next After Coal and Iron Along Monongahela River

MODERN METHODS ARE USED

Probably there is no one industry outside the coal and iron business of more magnitude, in and around the Pittsburg district, at the present time, than the sand and gravel production and consumption.

To a casual observer, one who occasionally frequents the shores of the three rivers, it is no unusual sight to see a rudely constructed dingy scow or digger boat anchored out in the river with a half dozen or more flats lashed to the side, while endless chains, elevators and a continuous bucket system are grinding away bringing up from the depths of the river bottim, the accumulations of years past. It is not of much significance at first in its muddy and dirty state, but once it undergoes a process of screens and a perfect washing, with the waste material thrown back into the river, it becomes one of the most valuable commercial products of the day.

It is only of comparatively recent date that the sand and gravel trade came into such prominence and by reason of its adoption and universal use in concrete work so largely predominating at the present time in the construction of bridges, retaining walls and other similar work, it has assumed huge proportions and is now firmly established along many of the navigable rivers of the country.

To realize the importance of this business it is only necessary to observe the fleets of steamboats and sand barges that daily ply the rivers and which have been brought into such universal use in the transportation of this commodity. The former "sand scratcher," so-called, of the early days has been supplanted by modernly constructed dredges, capable of digging a dozen flats of either sand or gravel in a day, and which can deliver them with its own power to some shipping point, returning later with an empty fleet to the scene of its labors.

The heaviest producers and shippers of these commodities in and around Pittsburg are the Rodgers Sand Co., the Iron City Sand Co., Keystone Sand Co., and the J. K. Davidson Sand Co., the latter plying

MONONGAHELA SCHOOLS OPENED YESTERDAY

The public schools of Monongahela opened Monday after being closed down for a number of weeks, owing to the influenza quarantine. The malady did not strike Monongahela as severely as some other localities, although more cases have been reported this week than any time yet.

GERMAN AGENTS QUIETLY ARRESTED

Through the arrest and without any flare of trumpets the taking of Sam Saloman and H. H. Yodkin, a pair of exceedingly clever young German secret service agents, from Greensburg by government agents, the most unique and original Hun Scheme to cripple the production of steam gas and coking coal in this section was nipped.

Saloman and Yadkin knowing that a great deal of carbide is used by the miners in open lamps in the production of coal, landed in Westmoreland county and began an effort to corner the supply. This the agents were making progress in by going to dealers in this chemical necessity, paying cash for the stock and in some instances readily offering a bonus.

Accordingly a pair of expert plain clothes men were consulted and a trap was set. When Salomon and Yadkin appeared next day to purchase carbide and dealings had made proper progress, the secret service men did their work. The arrest and search of the agents personally revealed the fact that the fellows were working out of New York headquarters and that while the carbide was consigned on friendly ships from New York to Brazil, but which in reality was to be transferred in mid-Atlantic to giant subs of the Deutschland type and taken back to Germany. These purchases were intended to cripple the coal production in this county and to give Germany a much needed chemical to be converted into powder.

Mrs. W. P. McCullough of Lynchburg, Va., and Mrs. F. O. Leonard of Buchhannon, W. Va., are visiting their parents, Mr. and Mrs. F. A. Wise at the home of Mrs. U. S. Orange.

AMERICANS HAVE STRONG NERVES

Nervousness and Nerve Troubles on the Decline

"Nothing wrong but your nerves", is a saying that is fast dying out in this country. While nerve trouble is no organic disease, a leading nerve specialist remarked: "A man or woman might better break a leg than have a shattered nervous system".

Overwork and worry drains the nerve cells of their reserve strength and food, and then follows the sleepless night, indigestion, poor appetite, impure blood and general nervous break-down.

The thing to do in such cases no longer troubles doctors and their patients who know from their own experience the value of Phosphated Iron. They know that a few weeks' regular use of this nerve food and red blood builder will strengthen and brace up the whole nervous system, because Phosphated Iron gives the tired, hungry, worn-out nerve cells phosphates and iron, in a form easily and quickly absorbed; as one happy user said: "You can almost feel it taking hold of the nerves and blood, after a short time you feel like a new person; life seems a pleasure and worth living once again".

In every section where Phosphated Iron has been used there has been a big decrease of nerve troubles and it will prove a welcome relief to any sufferer. You can bank on it for results—it's pure.

To insure physicians and their patients getting the genuine Phosphated Iron, we have put up in capsules only. Do not take pills or tablets. Insist on capsules.

W. F. Hennings the Druggist and Leading Druggists Everywhere.

Sloan's Liniment Kills Pain

SOMETHING NEW IN WARFARE

Party of Highlanders Repelled German Attack, but at Terrible Cost; They Lost Their "Paritch."

A wounded officer describes the novel way in which a small party of surprised Highlanders met an unexpected enemy attack.

"The Germans got further into the trenches," he writes. "So far, indeed, that they surprised a party of Highlanders in the peaceful occupation of porridge making for a section due for night duty. The porridge makers had no time to seize weapons. Instead they seized their precious pot of porridge and flung it in the face of the advancing foe. There were yells of rage as the scalding porridge fell among the soldiers of the kaiser. One of the funniest sights of the whole war, I am told, was to see a German officer trying to look dignified before his men in a uniform covered with porridge. The method of repelling the attack was novel, but effective. It was more deadly than liquid fire, I fancy, for it put an end to the attack in that quarter.

"When we relieved the Highland porridge makers we found them in a terrible funk, they didn't mind facing the worst attack the enemy could make, but they were quaking at the prospect of explaining to hungry comrades what had happened to the porridge. I tried to console the man with whom this brainy idea originated by telling him he ought to have the V. C. He would have none of my consolation. 'That may be,' he answered, 'but what aboot Wee Jock ——'s paritch? He'll hammer h— out o' me when he comes back and finds it's a' wasted on they German devils!'"

NO COUNTRY FOR POOR MAN

Brazilians Are Compelled to Pay Extraordinarily High Prices for All the Necessaries of Life.

Rio de Janeiro, the most wonderfully reconstructed city in the world, was also, until recently, one of the most pleasure loving. Today the president is endeavoring to instill war economy into the nation before it feels the brunt of war—a by no means easy task. Economy is not easily preached in a country where state loiteries are of daily, and public holidays of all too frequent, occurrence. The most popular of the latter is the carnival, which occupies the four days preceding Ash Wednesday.

Brazilians who complain of the high cost of living will probably wish to see war economy continued in times of peace. It costs about $7.20 a day to live at all comfortably in Rio. Some manufactured articles are now difficult to obtain, and the cost of everything "owing to the war" and the colossal protective tariffs, is such as to make unaccustomed English folks feel faint with terror. A ready-made drill jacket, though cheaper in back streets, will be commonly priced at $10.80 in shops on the Avenida Rio Branco. A tailor-made man's suit will cost about $50.—From the United States Naval Institute Proceedings.

Almost Lost Precious Card.

One of those "absentee registrants" signed up at the city postoffice one day last week, and received his registration card for transmission to his local board in his home town.

This man must have been an absent-minded registrant as well, as the sequel will show. He calmly placed the registration card in an envelope, addressed the envelope to his local board, put on the stamp, and walked out into the street.

As he passed a trash box he dropped the letter into the opening and went his way with a clear conscience of having done his first duty under the man power law.

Luckily for him, a postman coming out of the building saw the mistake he made and rescued the letter from the trash. By this time the registrant had boarded a car, so the letter carrier dropped the letter containing the precious card into the letter box.—Washington Star.

Birdmen's Patron Saint.

The cardinal archbishop of Westminster, who has initiated the Guild of St. Michael for Airmen, invites all Roman Catholic airmen "to place themselves under the protection of St. Michael by joining the guild." No one could desire a doughtier champion, remarks a London paper, but the choice of the Russian airmen, who in the early days of the war decided on Elijah as their patron saint, is perhaps even more possible. It is, at all events, plain that these days have given an entirely new meaning to the phrase "a place of the powers of the air."

The following is from a letter written by a member of the United States air forces in France: "I was the most of all afraid I was from Kansas and the first news what I got of away! Any nation that fills the skies of the dead with bombs in order to kill the chaps that come out to get them has no consideration from me and thanks when the Germans do some other things."

Fire Clay Substitute.

The great assistance to heat of ordinary coal ash has suggested the use of this material for fire bricks in place of fire clay. It is claimed that a suitable binder has been provided in a new process, and several thousand experimental bricks already made are being tested, both as a fireproof building material and as a furnace lining.

DIED

Mrs. John Oates.

Mrs. Ellen McGuire Oates, wife of John J. Oates, died at the family home, North Charleroi, Sunday morning, November 17, at 4 o'clock in the 43rd year of her age. Private funeral services will be held Wednesday morning, with interment to follow in Calvary cemetery. She is survived by her husband, six sons, two of whom Thomas and Dennis are now in France serving with the American Expeditionary Forces, and three daughters.

Marcy Ann Barney.

Mary Ann Barney died at her home 935 McKean avenue, November 18, in the 21st year of her age. Interment will take place in Calvary cemetery.

Bertha Yeager.

Bertha Yeager, infant daughter of Mr. and Mrs. Joseph Yeager, died at the family home Nov. 18. Interment will take place in Calvary cemetery.

Estella Ososis.

Estella, infant daughter of Mr. and Mrs. Frank Ososis, died Nov. 18, at the family home, 1218 Meadow avenue. Interment in Calvary cemetery.

Funeral of Harry Hallas.

Funeral services for Harry Hallas, late proprietor of the Busy Bee restaurant will be held Wednesday afternoon at 2 o'clock at the mortuary of M. T. Crowley, McKean avenue, with interment to follow in Charleroi cemetery.

DONORA'S BIG FUND FOR WAR ACTIVITIES

Donora made a great record in the United War Work Campaign which officially ended Monday evening, but which in some localities has been extended for a period of two days. With a quota of $20,000 the total subscriptions of theborough to the fund are now $112,000 or over five and one-half times thequota. This splendid result was not obtained without hard work, however, as the campaign was seriously handicapped by the influenza epidemic. Solicitors were unable to make canvasses and there was no opportunity for public meetings. The record made by Donora will go a long way in helping the county to maintain its record on war emergency funds and is one of which the town may well be proud.

SAVE WOOD FOR THE HOME FIRES

There will an inevitable shortage of coal this winter and many people who have contributed coal to the destitute will be unable to buy it.

In order to provide against this distressing situation all mills, factories, mines, railroads and other enterprises having waste lumber are asked not to destroy it but to cut it into suitable lengths and notify this Committee by phone or letter when they have a quantity sufficient to justify removal.

Farmers can also help very much by taking to their towns waste wood cut in short lengths.

Pennsylvania Council of National Defense and Committee of Public Safety, Washington County Branch.

Lady Grateful for Help Received.

"For 15 years I suffered increasingly with stomach and liver trouble. Bloating with gas distressed me very much and caused serious heart fluttering. All medicine only relieved temporarily. I gave up hope of ever being cured. My druggist advised me one day to try Mayr's Wonderful Remedy. I am feeling like a new woman since and can now eat anything with no ill results." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.

Fipers Pharmacy, Carrolls Pharmacy and druggists everywhere.

STATE BANKS MAKE A GOOD SHOWING

Reports made to State Banking Commissioner Daniel F. Lafean, of Harrisburg by 500 of the 542 state chartered banks, trust companies and savings institutions under supervision of the state government, show that they oversubscribed their quotas of the Fourth Liberty Loan by more than $55,000,000.

The total quota for these institutions was $289,271,562.49. The officially reported subscriptions are $344,880,892, or what is calculated as a net oversubscription of $55,609,359.-51. Of the institutions 106 were short in their quotas. There were 382,825 subscribers.

Commissioner Lafean says: "The handsome oversubscription shown by the state institutions, clearly shows the activity of these banks in making the Fiurth Liberty Loan a success."

SAND AND GRAVEL PRODUCTION

Contmued from page 1.

their trade principally on the Allegheny river.

When one stops to think of the many and varied uses that sand and gravel is put to, it is not surprising to know that the demand must be great. At Donora only a few months ago a large number of concrete houses were erected by the American Steel and Wire Company, in which sand and gravel played a large part.

One or two of the larger firms are building new and larger diggers which will be supplied with much more up-to-date machinery, and which are expected to achieve splendid results. The demand for sand and gravel promises to be greater than ever the coming season and dealers are fortifying themselves accordingly.
